On The Right Track® patented track and Hookless® ring technology allow to replace/exchange hospital cubicle curtains in less than a minute, without the need of a ladder.

Facilities that utilize the On The Right Track® system can change curtains more frequently; minimize the risk of **Hospital Acquired Infections***, lower replacement costs, cut laundry costs and overcome the risk of ladder accidents. They can also offer a faster Patient Throughput and a better patient experience, because the curtains are virtually silent and always look fresh and clean.

**In American hospitals alone, the Centers for Disease Control (CDC) estimates that HAIs account for an estimated 1.7 million infections and 99,000 associated deaths each year. Cubicle Curtains are a major contributor: HAI's are transferred by hand to cubicle curtains that are in direct contact with most patients. The solution is to wash and/or change the curtain more frequently.*
